"Hypothesis Testing Using R"

24 August 2016
QUT Gardens Point, Brisbane
Trainer: Dr Anne Bernard, QFAB@QCIF

Course summary

During this workshop, participants carried out practical exercises in the following topics:

- Choosing the right statistical tests appropriate for the data and research questions
- Carry out inferential statistics in R
- Generate plots, figures and tables using specific R packages to illustrate results
- Interpreting the output and reporting the results
